Executive Summary

Intelligent automation across Billing, Collections and Reconciliation targets a 40% productivity gain by end of Year 2

63 FTEs
Baseline headcount across 3 units

~13.8K
Monthly invoices across 7 streams

~8.7K
collection accounts / transactions handled per month

970K+
Active healthcare members served

BILLING STREAM — 30 FTEs

Billing Automation App

Seamlessly integrates legacy systems to automate data entry, accelerates three-way billing validation, and posts finalized records directly into Microsoft Dynamics NAV for streamlined financial operations.

Impact: Effort reduction on validation and data entry; fewer invoice revisions; ERP-agnostic design

COLLECTIONS STREAM — 27 FTEs

Intelligent Collections System

Replaces spreadsheets with live AR ingestion, automated DPD-triggered dunning, auto captured promise-to-pay tracking and Live Dashboards.

Impact: Streamlined end-to-end collections through automated dunning, PTP tracking, accelerated handle times, and unified AR analytics

RECONCILIATION — 6 FTEs

Intelligent Reconciliations System

Instantly extracts and validates payment receipt data, routes variances to specialists, and provides immediate context for rapid ledger adjustments and dispute resolution.

Impact: Accelerated reconciliation through automated variance handling, intelligent document validation, and audit-ready regulatory compliance

PRODUCTIVITY ROADMAP

63 FTEs Baseline (As-Is) → **46 FTEs** End of Year 1 (−27%) → **38 FTEs** End of Year 2 (−40%) → **38 FTEs** Year 3 · 40% sustained

Our Value Proposition for Medicard Collections

Beyond a 10–15% collections uplift, the Intelligent Collections System cuts DSO, lifts recovery and frees ~40% of collections effort

WHAT WE DELIVER

1. **Seamless AR integration**
   Unifies data by connecting directly with all accounts receivable sources
2. **Automated dunning**
   Drives the revenue recovery lifecycle through DPD-triggered bulk communications
3. **Real-time reporting**
   Generates continuous, live AR tracking without manual data manipulation
4. **Leadership dashboards**
   Empowers management with advanced KPIs for strategic oversight and decisions

WHAT MEDICARD GAINS: FINANCIAL

~10–15%	~7–10%	~5–7%
Collections uplift Every due account reached	**DSO reduction** Earlier reminders, faster cash	**Recovery rate uplift** Focus on aged receivables

OPERATIONAL

~40% less effort Collections team from 27 to 16 FTEs by end of Year 2	**Faster handling** Lower handle time on manual collection steps	**Commitments kept** Promises to pay tracked with automated follow-up
Every contact logged Structured outreach ensures 100% contact	**Targets that steer** Formal goals and live KPIs for aged accounts and outreach	**Lower credit risk** Earlier recovery reduces ECL exposure and write-offs

Note: Financial ranges are indicative, to be validated against Medicard's baseline

Our Understanding

Current State | Processes at a Glance

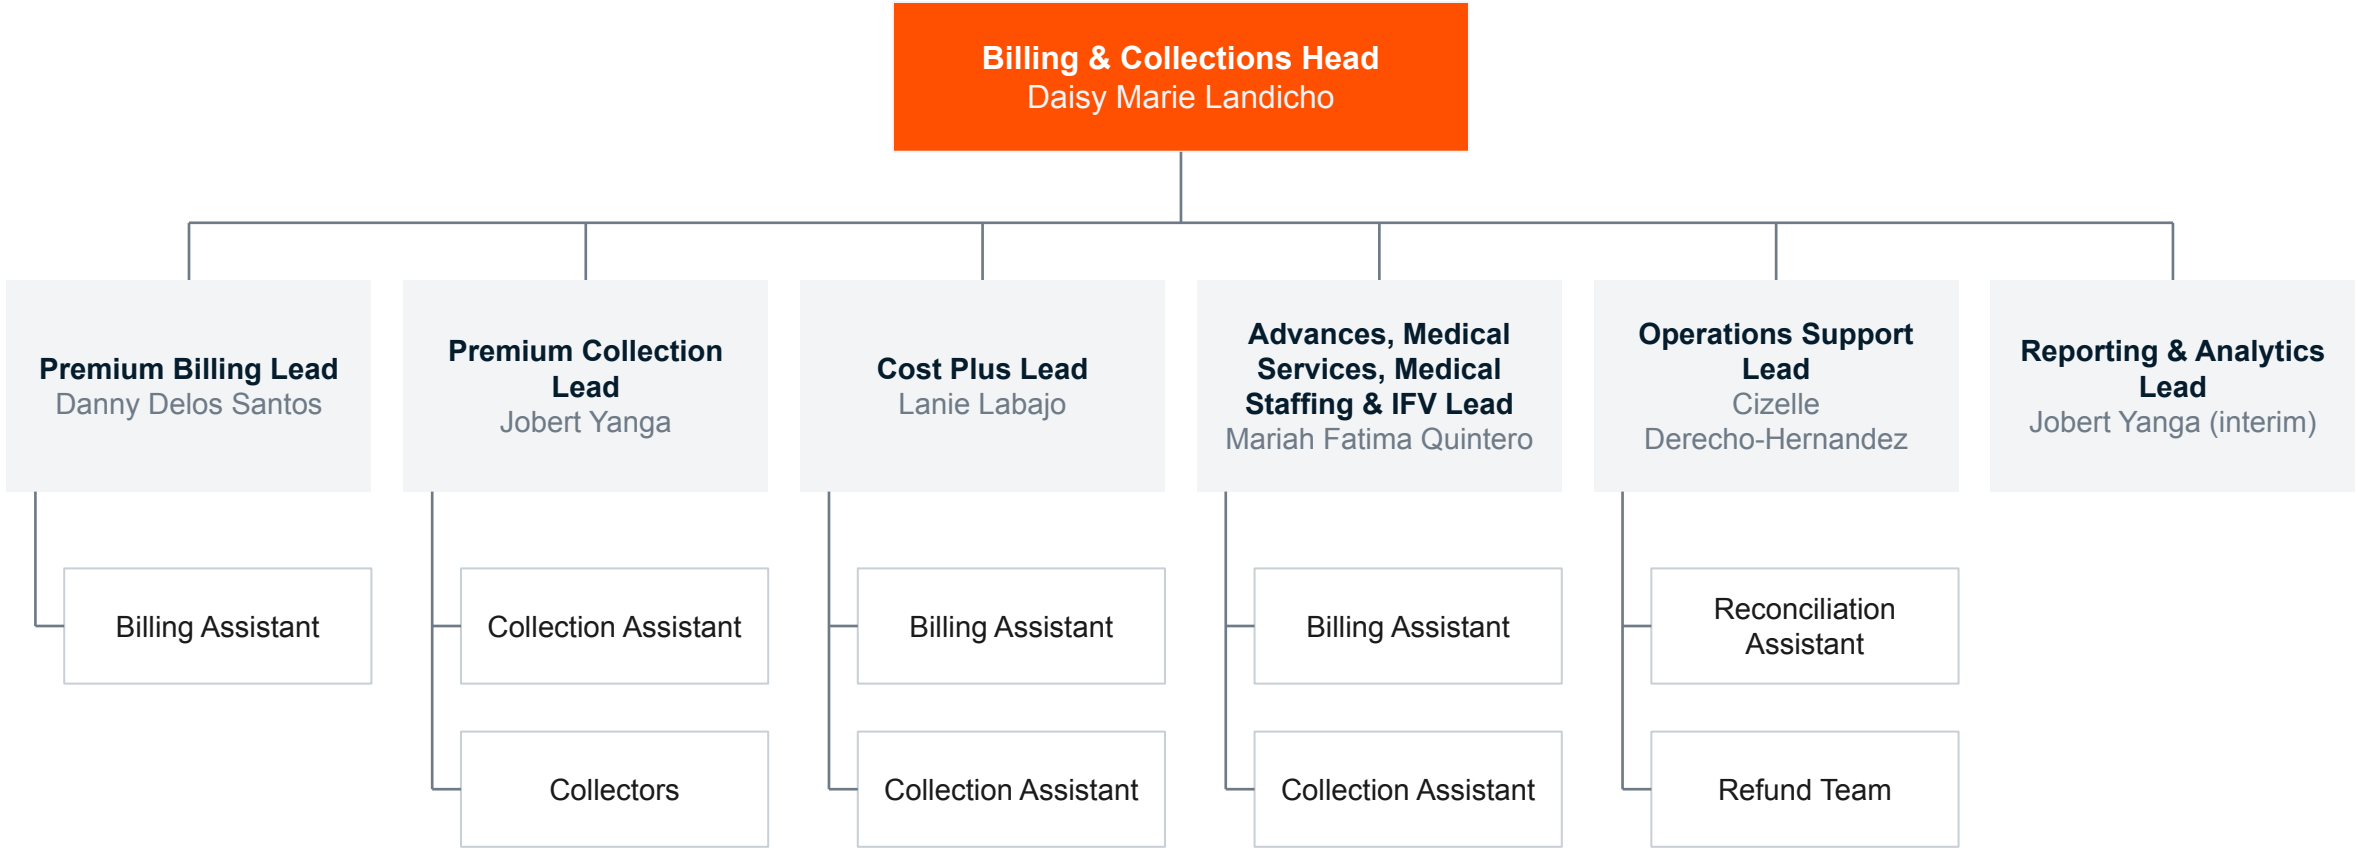

Three process units with 63 FTEs operate on NAV 2016, email and manual channels

	Billing	Collections	Reconciliation
FTEs	30 FTEs	27 FTEs	6 FTEs
Core activities	• Billing of invoices • Adjustment of invoices • Recognition of revenue	• Monitoring of MFR & medical services accounts • Issuance of AR • Collection of outstanding receivables • Provisioning & write-offs	Reconciliation of membership fee receivables
Channels	• Manual email distribution • SharePoint library • Physical delivery by messenger	• Emails and phone calls • MS Teams meetings	• Emails and phone calls • MS Teams meetings
Tools	• MS Dynamics NAV (Navision 2016) • Supporting legacy apps • MediCard Intranet, SharePoint & MS Office	• Genesys telephony (calls made from personal mobiles) • MS Dynamics NAV 2016 and legacy apps	• MediCard Intranet • SharePoint & MS Office
KPIs	• Timely billing • Billing accuracy • On-time invoice issuance	• Timely collection vs. materiality (%) • AR aging (T+30 to T+365)	Credit risk: expected credit loss (ECL)

Current State | Diagnostic

A comprehensive diagnostic reveals heavy dependency on offline spreadsheets, manual verification gates, and unmonitored outreach

Billing Bottlenecks

Manual 2-Way & 3-Way Match: Transmittals, claims, and DTRs are manually validated against Intranet/legacy systems and require a secondary re-check by the Billing Lead before NAV posting.

Manual NAV Encoding: Direct line-item keying and GL entry selection into Navision 2016 causes significant billing processing delays.

Zero-Rated VAT Follow-Ups: Offline email chasing with the Sales team to verify and secure missing tax certificates.

Physical Distribution: Time-consuming dispatch process relying on manual PDF emails and physical messenger/courier deliveries for special accounts.

Collections Friction

Manual Spreadsheet Tracking: AR aging reports are manually extracted from NAV via SSRS and rely on manual Excel macros for consolidation. .

Personal Mobile Calls: Outbound collections are conducted via personal mobile phones, completely lacking telephony integration or automated call recording.

No Outreach Targets: Monthly outreach call volumes are untracked, and there are no established agent-level targets for recovering aged accounts.

Untracked PTP Commitments: Promises to Pay (PTP) and payment commitments are logged manually in spreadsheets without automated dunning triggers or system follow-ups.

Reconciliation Gaps

Macro Vulnerability: Monthly MFR vs. Trial Balance and quarterly Cost-Plus control reconciliations are heavily dependent on manual Excel files and fragile macros.

Manual Investigation: Variance identification is highly manual, requiring cross-departmental hand-offs to the Claims team to resolve discrepancies.

IT Dependency: High reliance on raising IT Service Help Desk tickets to fix system errors before reconciliations can be finalized.

Delayed Close: Extended manual investigation and cross-team coordination cycles (e.g. 5-day TATs) bottleneck month-end and quarter-end financial reporting deadlines.

Current State | Volume and KPIs

Comprehensive operational baseline metrics, volumes, and service level agreements (SLAs)

Billing Process Volumes

- Monthly Invoicing Volume: ~13,815 invoices generated per month across all 6 business lines.
- Workstream Breakdown: Covers 7 operational streams: Premium, Cost-Plus, Advances, Medical Services, Medical Staffing, IFVs and Retail.

KPIs & Target SLAs for Billing Process

- On-Time Invoice Issuance (SLA): New Invoices Issued within 5 working days of receiving transmittals.
- Invoice Delivery SLA: Invoices dispatched via email within 2 to 5 working days of NAV posting.
- Billing Accuracy: 99% accuracy on multi-way matching (Transmittal / Claims / DTR vs. Intranet vs. SOB/NAV).

Collection Process Volumes

- Active member count per geography - As of September 14, 2026: 970,445 active members
- The monthly volume of collection outreach is not currently tracked as a standalone metric. Collection outreach is conducted continuously throughout the month based on billing due dates, aging accounts, payment commitments, and collection priorities.
- Average monthly collection volume of 8,692 accounts/transactions
- Seasonal Spike during renewal periods, month-end close activities, high-volume billing periods, and collection efforts for overdue accounts.

KPIs & Target SLAs for Collection Process

- KPI is separated into two (Monthly Overdue & Recoverability of age receivables)
- Monthly overdue/age accounts tracking: No established target yet but to collect majority of aged accounts monthly.
- Premium Collection: Established collection targets include a 90% collection rate target

Recommended Transformation

Transformation Approach

Three distinct solutions address the root causes found in the diagnostic

#	Process	Transformation Description	Benefits
1	Billing Process	**Billing Automation App** • Automated 3-Way Validation: Accelerates data extraction and enables precise 3-way validation for billing agents • Legacy System Integration: Seamlessly connects existing platforms to automate foundational billing data entry.. • NAV Synchronization: Routes and posts finalized billing data into Microsoft Dynamics NAV.	• Reduction in Average Handle time of all manual billing processes • Reduced invoice revisions and increased taxability detection • Future-proofed, ERP-agnostic design ensuring seamless integration with modern ERPs.
2	Collections Process	**Intelligent Collections System** • Seamless AR Integration: Unifies data by connecting directly with all Accounts Receivable sources. • Automated Dunning: Drives the revenue recovery lifecycle via DPD-triggered bulk communications. • Real-Time Reporting: Generates continuous, live AR tracking without manual data manipulation. • Leadership Dashboards: Empowers management with advanced KPIs for strategic oversight and decision-making.	• Reduce AHT for all manual collections process • Improved tracking of overall collections process and success KPIs • DPD-Triggered Precision automated Dunning Reminders • Automated Promise-to-Pay (PTP) & Structured Payment Plan Tracking • Real-Time Accounts Receivable (AR) Analytics & Unified Dashboard
3	Reconciliation Process	**Intelligent Reconciliation System** • AI Document Extraction: Instantly validates data from client payment receipts. • Smart Exception Routing: Routes complex variances and short-pays directly to human specialists. • Context-Rich Resolution: Equips agents with the exact data needed for instant ledger adjustments.	• Reduced AHT in manual reconciliation process • Automated Variance Management • Intelligent and accelerated validation of unstructured and complex data like tax certificates, bank remittance, receipts etc • Ironclad Auditability & Compliance : Digitally logs every transaction to guarantee complete financial regulatory compliance.

Strategic Value Realization: Impacts of the Intelligent Automation Ecosystem

The automation ecosystem creates value across six levers, from productivity to risk mitigation

ACCELERATED CYCLES

Increased Productivity

Automated 3-way matches while eliminating manual Excel-based tracking and workdesks across billing, collections, and reconciliation.

HIGH COLLECTIONS VELOCITY

Enhanced Revenue Realization

Intelligent, segmented dunning drives improved collections velocity and significantly reduces Days Sales Outstanding (DSO).

SECURED COMMITMENTS

Proactive Notifications

Automated alerts for promised payments boost collections velocity and eliminate manual Excel tracking and follow-through.

OPTIMISED FOCUS

Strategic Account Prioritisation

Assist agents to target high-value delinquent accounts, replacing manual workdesks with automated priority queues.

ZERO ERROR MARGIN

Uncompromised Data Fidelity

Eliminate Excel-based tracking and manual workdesks across billing, recon, and data entry to guarantee absolute accuracy.

ZERO BLIND SPOTS

Comprehensive Risk Mitigation

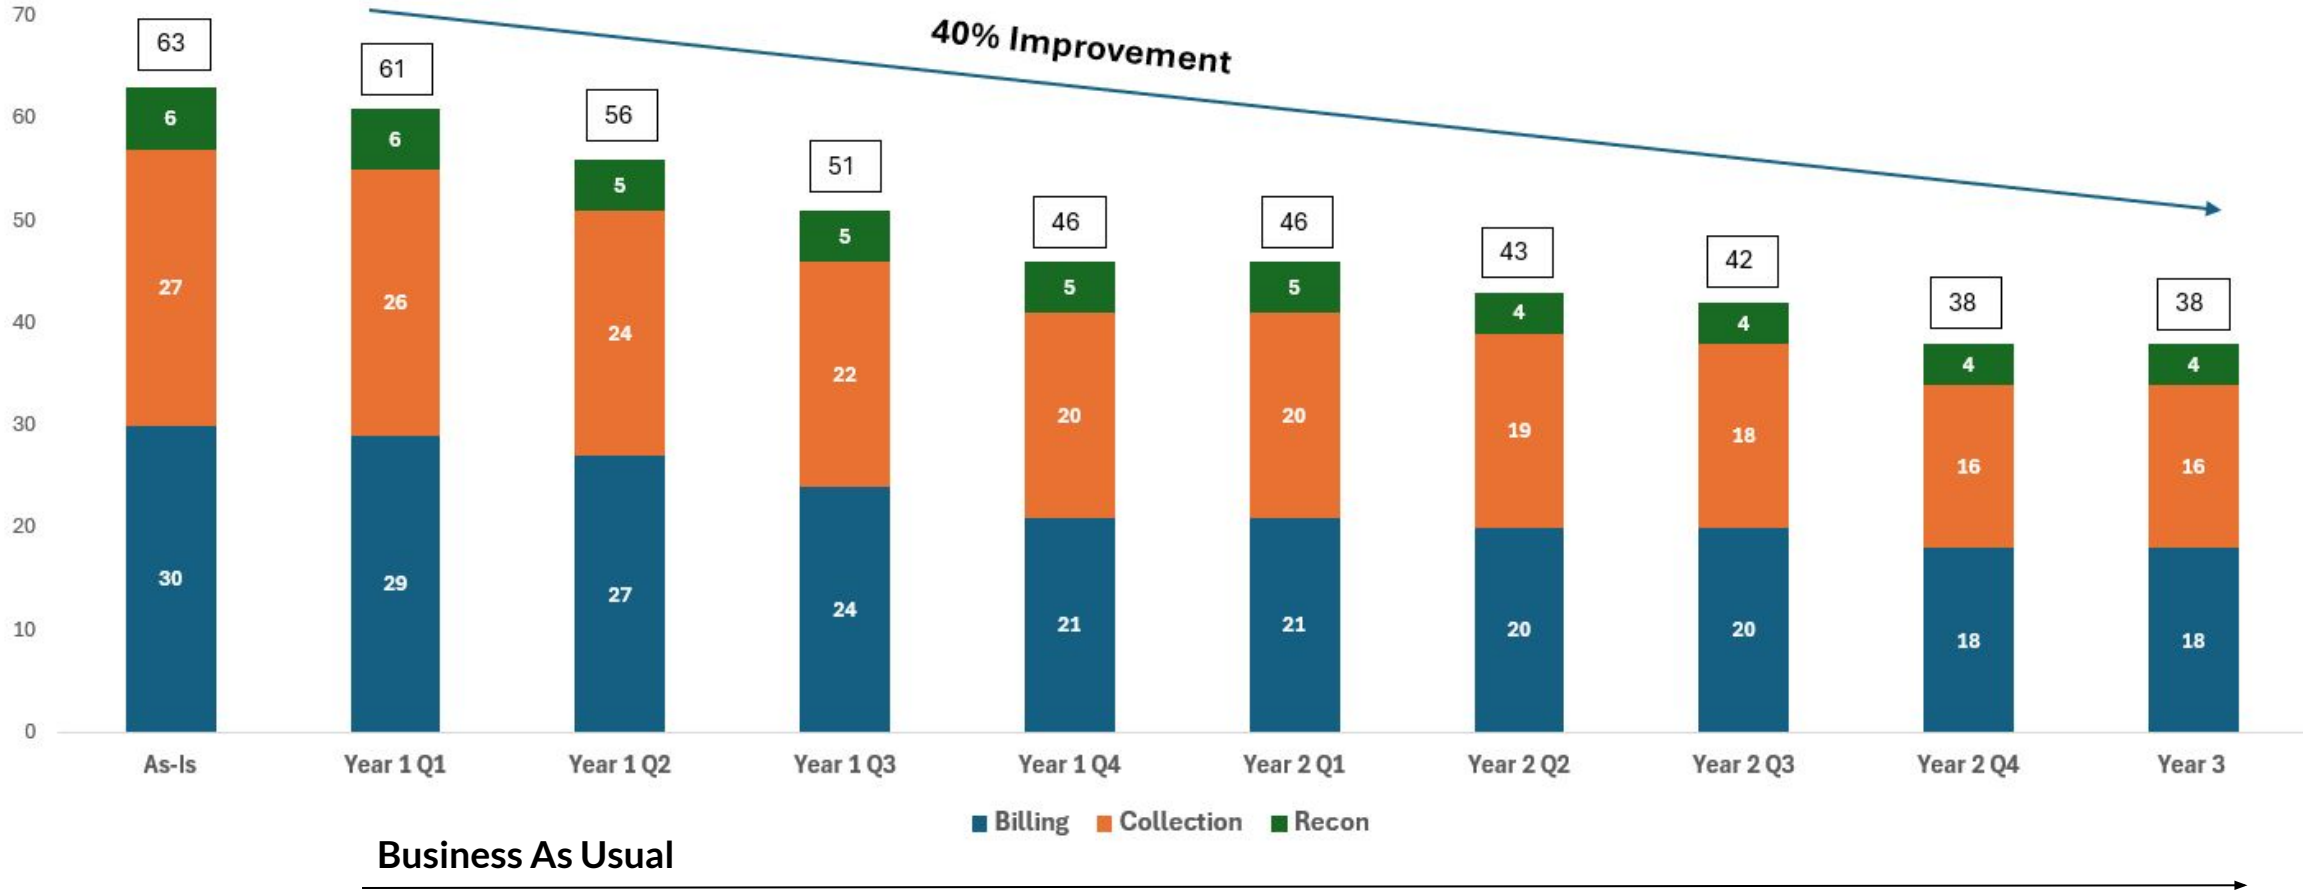

Ensure 100% financial integrity, reduced DSO, and audit readiness with validation gates replacing manual offline workdesks.

Productivity Improvement Commitment

FTE requirement falls from 63 to 38 (–40%) by end of Year 2 and is sustained through Year 3

BASELINE (AS-IS)
63 FTEs
Medicard Team Capacity

END OF YEAR 1
46 FTEs
↓ 17 FTEs (-27%)

END OF YEAR 2
38 FTEs
↓ 25 FTEs (-40%)

YEAR 3
38 FTEs
40% Sustained Efficiency
